

Drone Racing Track

Gate Layout & Coordinate Reference for Contestants

Bird's-eye view of the track. The blue line is the racing line; numbered markers identify each gate. Grid squares are 16.4 ft.

Coordinate System

Track boundary: 85 ft wide (X) by 165 ft long (Y).

Origin (0, 0): Top-left corner of the track boundary, as marked on the map.

X axis: Measured to the right, along the top edge (0 to 85 ft).

Y axis: Measured downward on the map, along the left edge (0 to 165 ft).

Gate position: X and Y give the **center** of each gate opening.

Rotation: Direction of flight through the gate, measured **clockwise** from 0°. 0° = toward the top edge (decreasing Y), 90° = right (+X), 180° = down (+Y), 270° = left (-X).

Race order: Gates are flown in numerical order, starting at Gate 1.

Gate Center Positions

Gate	X (ft)	Y (ft)	Rot. (°)	Flight direction
1 START	12.0	71.0	0	Up
2	16.0	39.0	0	Up
3	40.0	17.0	90	Right
4	72.0	40.0	180	Down
5	66.0	70.0	215	Down-left
6	41.0	86.0	90	Right
7	70.5	106.6	180	Down
8	60.0	129.0	215	Down-left
9	39.7	147.7	180	Down
10	13.0	110.0	0	Up
